Government offers Additional Public Lands to

Homeseekers.

United States Reclamation Sixvice announces the opening and availibility the latter part of April, of a large number of de sirable homesteads in the webknown showhome naigration pr. ject near Yellov, stone Matron to Park, Wyoming. This opening will mark the fifth unit to be offered, an excellent opportor is for the serious homemaker to secure a desirable 40 or attacre in a district of pelever hanca tural worth.

According to an aumonger ment issued by Albert V. Teo: ard, Settlement Assent of the S. Reclamation Cervice on the Federal Building, the Govern Indicted and tried for ame, one ment during the past rix moutls has been swamped with appeals for suitable agricultural homesteads and the opening of the Shoshone lands will in a measure ble tracts in this section.

"There is no question but that the recent peculiar business and economic conditions have heen largely responsible for the increased demand for and widespread interest in the 'back to the land' movement, states M: Leonard. "The Government is desirous of encouraging this laudable movement in every proper way and seeks to make readily available information concerning the opportunities which exist for for the homeseeker. It is my desire that the Shoshone opening will attract an industrious class of people who will maintain the high standing of progressive farming which is rapidly transforming the Shoshone project into an agricultural community of accomplishment. tile soil, ample water supply, a splendid settlement with schools,

Buy it Now

For more than a year the habit of self-denial has been practised by the American people. Whatin the home, the farm or the shop, the inclination has been to refrain from purchasing. To save, no to wend has been the rule.

The moment has come to reverse the practice. The slogan which will lead to prosperity is Bay it now!

Never was it truer than at this moment that the prosperty of this people is in their own hands. By their own act they can hasten the end of the depression and speed arm, all of unexampled prosperity. That end and that arrival are ceriam to come in any event, but in widesprend determination to cast apprehension have pur upon us as the one will hasten the day,

spread far and wide the seeds of apprehension of hard times. 11 tot data Ross' in 10.

is carried on by many thousands of place. The beokeeper must then depeople in all parts of the United cide for himself the best number to be States. There are many places where kept and where they shall be placed. an experienced beekeeper can make a good living by devoting his entire The type of bive most generally time and attention to this line of used in this country consists of a work. It is usually unwise, however, plain wooden bax holding frances hing to undertake extensive beckeeping, the from n rahbet at the top and not U. S. department of agriculture tenching the sides, top or bottom, says, without considerable previous lilves of this type are made to hold experience on a small scale, since eight, ten or more frames. there are so many minor details which go to make up success.

The average annual honey yield per colony for the entire country, under twenty-five to thirty pounds of comb blvca in the aplary are interchangehoney or forty to fifty pounds of ex- able. All hives should be of tho tracted boney, the latter being more productive owing to the fact that the comb is used repentedly instend of belng made anew by the bees each time. The money return to be obtained from the crop depends entirely on the market and the method of selling the honey. If sold direct to the consumer, extracted honey brings from ten to twenty cents per jound, and comb honey from tifteen to twenty-five cents per section. If sold to dealers, to facilitate operation. As a rule, it the price varies from slx to ten cents for extracted honey and from teu to fifteen cents for comb honey.

The location of the blves is a mutter of considerable importance. As a rule it is better for hives to face. away from the prevulling wind and to be protected from high winds. In the North, a south slope is desirable. It is advisable for lilves to be so placed that the sun vill strike them early in the morning, so that the bees hecome active early in the day, and thun gain an advantage by getting the first

Super and Perforated Zinc Queen Excluder.

supply of nectar. It is also advnntageons to have the lives shaded during the hottest part of the day, so that the bees will not hang out in front of the blve instead of working. They should be so placed that the bees should not be done, for the rapid will not prove a nulsance to passersby or disturb live atock. This lutter precaution may save the beckeeper considerable trouble, for bees sometimes prove dangerous, especially to horses. Hees are also sometimes annoying in the early spring, for on their first flights they may spot clothes hung out to dry. This may be remedled by removing the bees from the cellars on days when no ciothes are to he hung out.

The plot on which the hives are placed ahould be kept free from weeds, especially in front of the ena lawn mower, but it will often be to pasture oue or more head of sheep

In the aplary inclosure. The bives should be far enough If hives are too close together there much unless unusually provoked or hive on returning, especially in the

As a rule, it is not considered hest locality will austain in to study the they are all useless.

Beekeeping for pleasure and pro. honey flora and the record of that

Whatever hive is chosen, there are certain important points which should be insisted on. The material should be of the best; the parts must be acmanagement, will probably be Orately made, so that all frames or

same style and size, and should be so simple as it is possible to make them, Is better to buy blyes and frames from a manufacturer of such goods rather than to try to make them, unless one ia an expert woodworker.

illves should be painted to protect them from the weather. It is usually desirable to use white paint to prevent excessive heat in the colony hot wenther. Other light colors are satisfactory, but it is best to avoid red

Hive Stands

Generally it is best to have each hive on a sepurate stand. The eptrance should be lower than any other part of the lilve. Stands of wood, bricks, tile, concrete blocks, or any other convenient material will auswer the purpose. The blve should be raised above the ground, so that the bottom will not rot. If is usually not necessary to raise the live more

Directions for Manipulations. Bees should be limitled so that they will be little disturbed in their work. As much us possible, stings should be avoided during manipulation. This is true, not so much because they are painfel to the eperator, but because the odor of polson which gots into the nir britates the other bees nad makes them more difficult to manage. For this reason it is most advisable wenr a ldack veil over a widebrimmed but and to have a good smoker. Gloves, however, are usually more an inconvenience than other-Clauntlets or rulber bands around the cuffs keep the beea from crawling an the sleeve. It is best to avold black clothing, since that color aeems to excite becs; a black felt

hat is especially to be avoided. Superfluous quick movements tend to irritate the bees. The hive should not be inred or disturbed may more than necessary. Rapid movements A Ten-Frama Hive With Comb-Honey are objectionable, because with their peculiar eye structure bees probably perceive motion more readily than they do objects. Persons not accustomed to bees, on approaching a hive, often sirlke at bees which fly toward them or make some quick movement of the head or hand to avoid the sting which they fear is to follow. This movement, even if not toward the bee, is far more likely to be followed by a sting than is remaining oulet.

> The best time to handle bees is during the middle of warm days, particularly during a honey flow. Never

Knives for Uncapping Honey.

trances. The grass may be cut with handle bees at night or on cold, wet days unless absolutely uccessary. The found more convenient and as efficient work of a beginner may be made much easier and more pleasaut by keeping gentle bees. Caucasians, Carniolans, itanats and some strains apart to permit of free manipulation. of Italians ordinarily do not sting is danger of bees entering the wrong except in bad weather. Common black bees or crosses of blacks with other races are more irritable. it may be well worth while for the leto keep more than one bundred col- ginner to procure gentle hees while onies in one aplary, and aplaries gaining experience in manipulation. should be at least two miles anart. Later on, this is less important, for There are so many factors to he con- the beckeeper fearns to handle heea ered, however, that no general rule with little inconvenience to himself can be laid down. The only way to or to the hees. Various remedies for how many colonies any given bee stings have been advocated, but

PRETTY THINGS FOR SUMMER

Homs Accessorics Are Designed to Give Effect of Daintiness-Much Cluny Lace is Used.

For furnishing the summer home retenne table overs and pillows chlong, rough, s unreand roll chapes are rew. Patterns have white or ratmal grounds, with bright florul deelans for the various accessories for the rummer lome. Other cretonne sets have the flowered fabrle combined with a band across each arricle of heavy filet or cluny inscrtlon, or handcrocheted Inscrtien. Table scurfs, curhion covers, bags of various shapes and sizes and dresser covers in cretonno while red, pink or delft blue deigns, and livery or natural filet lace are fulshed with a tidy braid of passementer's having a filinge.

Art rep in natural shades forms an urticule enshion cover edged with n building and fringe of a deeper shade then the goods. The design consists f graceful scrolls and long sprays of tinged leaves Benuiltul samples of stamped goods in rep and rough and smeo'h linen have musual scrolls, n quick oven for fifteen or twenty large flowers, trult, cic. French knots, antin and stem stitches are worked cut it—as soon as baked, as cutting with large silks. Dainty samplea have while hot will make it heavy. But trellises

Much cluny lace is used with white linen. Net motifs on linen pleces are The work is done through the net, which is basted on and the linen

cut away, leaving the net parts sheer. Luncheon sets made of Japanese toweling are quaint and effective. Narrow widths of this material are fagoted together with edges hemstitched. They are especially attractive for outdoor or porch use or summer cottago purposes. Sets can also be made from Japanese cotton crepo, which comes by the yard, edged with a narrow glmp in white and dark

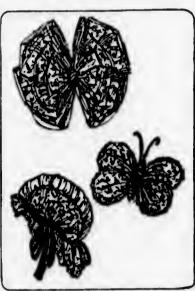

SUMMER CURTAINS OF NET

Wide Variety is Officed, and Prices Are Not Beyond Reach of Moderately Filled Purse.

In selecting made curtains in pairs. It is difficult to keep to the ideal of simplicity for the summer home, for the designa lend by insidious graduations from the plain bobblect to most cluborate curtains of imported, handmnde luce. To begin with, there are the net curtains with tiny edges and a two-inch insertion. The net is finer in thrend this year, the lace daintler in design and the heavy cluuy is discard. ed for better thread lace, yet prices vnry little from last year. Then there are curtains with pluin grounds and woven borders which suggest German Influence; while some of the copies of old lace borders, on plain net, are so well done that the beauty of effect wins eardon for the imitation. Another initution worthy of acceptance venetlan point lace, which is made by muchine on curtains of idain net,

A hard embroidery which has the appearance of lace is that which decorutes a new style of net curtain. It resembles chadow embroidery to some extent, and is done with soft, flat tirreads of sliky cotton. The design is first outlined and then entirely filled in with a sort of plarned work. These curtains have a deflency that suggests expense, yet they are less in price fect in lightness.

DAINTY ACCESSORIES

The group above shows some dainty This comes in many different dainty colors and is embroldered in white with a pinin chiffon edge. This edge is sbirred and wired to form the butterfly wings, the body being made of self-tone silk or satin which has been tucked and padded to the required shape. The little cap is of the embroldered and plain chiffon, with ruffie lace.

Laced Boots Little Worn. Laced boots just now are a negligible quantity. They are woru only on the tennis court and yacht's deckwith heelless soles of rubber. All boots for general and formul wear have beautifully fitting buttoned tops, and most of them have bigh heels also. The gay tallieur of the season does not accord with "sensible" footweur aud the boots poultively must be dainty. trim and more or less frivolous to give the correct snsemble.

OR THE BEST SHORTCANE

Recipe From New England, Whare It Is Sald the Delicacy Was First Made

It is said that strnwberry shorttake originated in New England and wild strewherries were first used in if you have eaten such a short-*ake, made where "the wild strawharries grow," you know how superlor it is to the ordinary kind. However, we must content ourselves with cultivated herries. Reserve enough of the finest berries from two quarts o cover the top of your cake Cut the remaining herries in half, or siice if large; sugnr well and stand 'or an hour, at lenst. Make your ake with three pints of sifted postry flour, these teaspoonfuls of cream of ertar and a tenspoonful of sait sifted fluh in two tablespoonfuls of butter and one of land. Mix it with a plut of inlik with a teaspoonful of scala dissolved in it. Three teaspoonfuls of baking powder may replace the ercam of tartar and soda. Roll or pat out half an Inch thick, and bake in either one or two cakes in minutes. Split the cake open-do act rosebuls in stripes on English-looking ter both top and bottom portions and apread each with a thick layer of berries; put together and serve with good rich eream-plain. Use wirlpped cream only for sweet strawberry cake.

FOR BUSY HOUSEWIVES

Knives which bave been used for onlons and smell of them can be cleaned by drawing them through a piece of carrot two or three times.

To remove hot water marks from lapanned trays use sweet oll. Rub It in well till all marks disappear, then pollsh the trny with dry flour and a soft cloth.

When gilt frames or moiding of rooms have specks of dirt from files and other causes upon them they may be cleaned with white of egg applied with a camel-hair brush.

feel onlong from the root upward and they will not make your eyes

Save cold tea left from supper and use in place of water on your bouse pinnts

Starch should be mixed with sospy water, for thus the linen will bave a p:ore glassy appearance and be less likely to stick to the Iron.

Silver teapots that have not been used for some time get musty and so give a peculiar finvor. This ena be prevented by putting a lump of sugar into the pot before putting away.

Poor Man's Mushrooms.

Radisbes have always been considned good only to ent raw. Try the following when mushrooms are at a premlum: i'eel and slice large raifishes, and when you put your steak in the pan turn in the sliced radishes and is a narrow insertion and edge of allow them to cook in the juice of the steak until quite brown. Before taklng them out put in a generous piece of butter. Senson with salt and pep-They can hardly be detected from the real article.

Radishes are niways very good when bolled as turnips. Boil until very soft. seasim, mash and cream.- Delineator

Cornstarch Flg Pudding

Three cupfuls milk, one half cupful cornstarch, one-fourth cupful sugar, than many which bave heavy cluny one-fourth level teaspoonful salt, embellishment. They are linished with, whites two eggs, six tigs sliced and cut a simple hem in order to keep their ef. in small pieces. Scald the milk in double boller. Mlx cornstarch, sugnr and milk. Add to the hot milk and stir until thick and smonth. Add the figs, cover and cook for 20 minutes. sthring occusionally Beat the whites of eggs stiff and add the hot mixture gradually, bentling it in. Pour into mold wet with cold water and chill Serve with cream. May be served hot if desired.

Scalloped Mutton.

Cut cold mutton into thin little For each cupful of meat add one-half teaspoonful of salt and blt of pepper. Butter a baking dish, cover bottom with bread crumbs, then a lnyer of meat, with a little gravy or tomato sauce Continue until dish 's fuil. Cover top with thin slices of rnw potato, dot with butter, cover close and bake 45 minutes; uncover and brown 15 minutes.

Baked Sliced Ham.

Place in baking pan a slice of ham ent one inch thick; if the ham is not mild it should be soaked in cold water an hour Sprinkle on top a little powdered mustard, two tablespoonfuls brown sugar, two tablespoonfuls vinegar, add little water and bake about furbelows which may be made from forty minutes, basting often. Add a the new embroidered chiffon ribbon. little bolling water to the gravy, but de not thicken.

Sausage Sandwiches.

Put small sausages on a baking dish and set in a hot oven. Turn occaslonsily until brown on all sides. Cool slightly and split lengthwise with a sharp knife. itutter a tbln slice of brown bread lightly, lay on a crisp lettuce leaf, then the sausage and last another slice of bread.

Grapefruit Salad.

To use grapefrult as a salad remove the puip from the rlad and add to lettuce leaves with chopped nuts or celery. Serve with either mayonualse or French dreaslag.

Arrowrest for Fruit Juices. tise arrowrest to thicken fruit juices. It cooks clearly and does not destroy the color, nor cloud the transparency of the fruit.

50,000 LOAVES

Oreat Cyaritable Act Exthe "Tanlac Man."

thousand loaves of bread wit be a treat. given away by L. T. Cooper the ple of Louisville.

Sunday morning, and between street. the hours of 10 and 12 o'c.ock. several thousand loaves of bread were distributed to the wathy on the big vacant lot on Wart's or by Carairah. Street, next to The Daily French

for the 50,000 leaves of lived to the American Baking Con , cerv.

When seen at the Coolbach where the noted visitor is topping, Mr. Cooper said:

"I have anticipated the bestinning of this work among the poor with keen interest. I have wanted to periority some small service of this kind in the metipolis city of my native state Kentucky, for several year?

"Therefore, the initial order for the bread, consisting of lift. thousand loaves, has been ver. to the American Baking Conpany, and the work has begin.

"We gave away several thou and loaves Sunday, and each time we will meet the demands.

The sale of Taulac, the 'antous medicine being intrduct in Louisville by the personal do Alperion are winned not to rection of Mr. Cooper, is now tre spars upon an, of the banks other from Hiram H.
